

Pairwise MPO distances: w1-trained student, combined-trained student, and target
($N = 8$, $T_{\text{model}} = 3$, MPO target with depolarizing noise p)

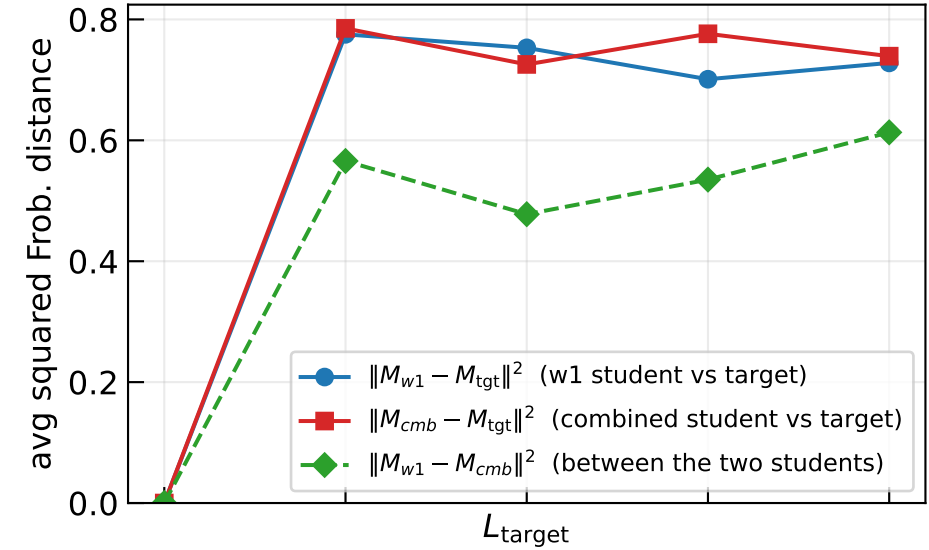

$p = 0.01$, weight-1 inputs (24)

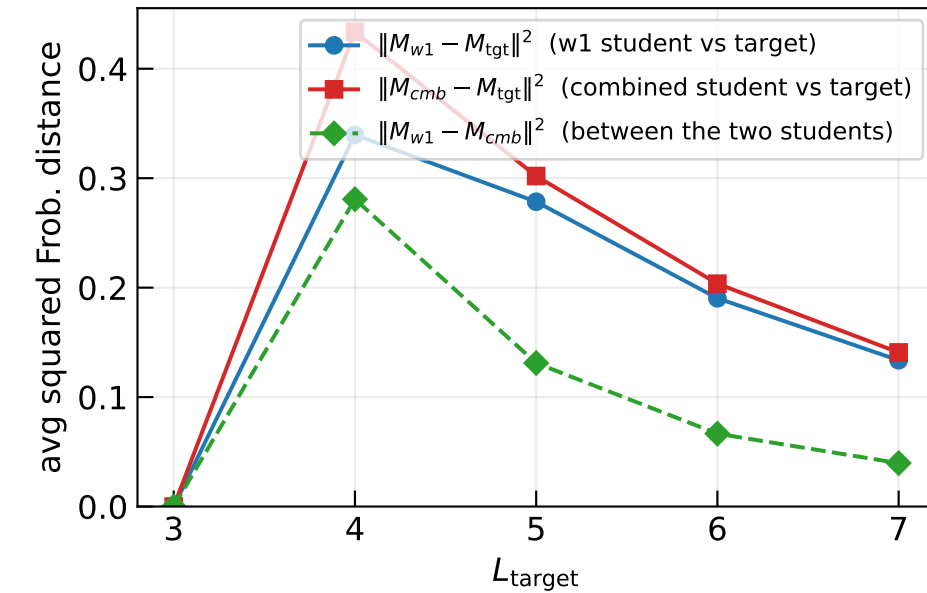

$p = 0.01$, weight-2 inputs (84)

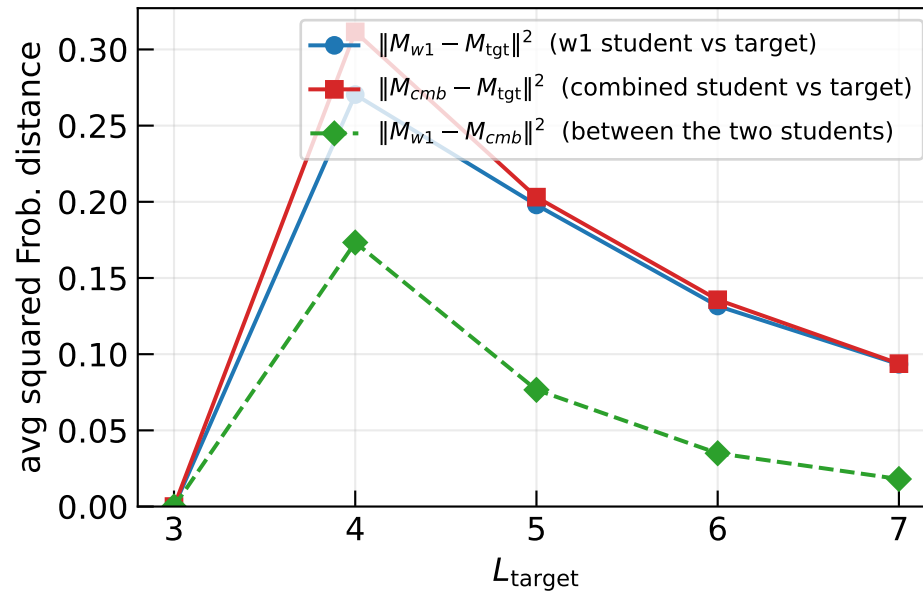

$p = 0.01$, random Paulis (500)

$p = 0.05$, weight-1 inputs (24)

$p = 0.05$, weight-2 inputs (84)

$p = 0.05$, random Paulis (500)
